

PRINTING CARRIER BAGS

DaklaPack can print your carrier bags in various ways. We use flexo printing, screen printing, hotfoil printing and silkscreen printing. By printing your carrier bag, you make it unique!

FLEXO PRINTING

Flexo printing involves the use of a flexible print plate. The print plate adapts itself to the material to be printed. This makes it possible to print various types of materials, such as plastic, cardboard and foils. The accuracy and quality of the flexible printing is so high that it approaches the quality of offset and rotogravure printing.

SCREEN PRINTING

Screen printing uses gauze stretched across a frame. A light-sensitive layer is applied to the gauze which is exposed using a positive film. The dark areas are removed after development, and the light areas are printed. This technique can be repeated with different colours and shapes, alongside and on top of one another. Screen printing is used for the middle part of carrier bags. Screen printing is not possible on the thicker parts at the bottom and/or side fold.

HOTFOIL PRINTING

Hotfoil printing is a technique in which the ink is applied to the packaging via a block or stamp. The ink is applied to the carrier bag through a roll of prepared foil, which bears a standard colour of ink. The heated stamp removes part of the ink from the foil and applies it directly to the carrier bag. The technique can only be used for our plastic carrier bags.

SILKSCREEN PRINTING

In silkscreen printing, the image is printed on foil. This foil is then printed onto the carrier bag.

PROMOTIONAL PACKAGING

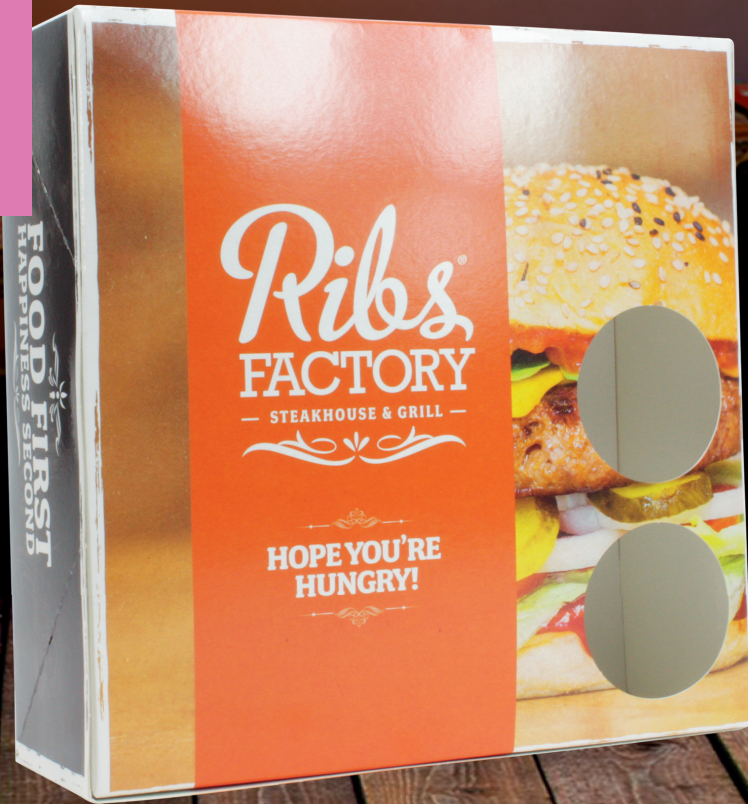

The promotional packaging of DaklaPack is eye-catching: in terms of colour, design and quality. Whether this involves carrier bags or gift boxes, the promotional packaging of DaklaPack adds value to your product.

Shops and webshops are increasingly being combined. This is creating a demand for functional and eye-catching packaging. We offer these eye-catching, sturdy packaging options in many colours, materials and formats.

There is virtually nothing you can think of that DaklaPack does not have packaging for, to fit your idea. All formats, including divergent formats, all types of printing and all the colours of the rainbow are possible. We either have it or will be happy to help you find a solution.

SUSTAINABLE PACKAGING

is environmentally friendly, sustainable and is the packaging of the future. In today's society, there is increasing attention paid to the responsible use of raw materials and preventing waste during production. DaklaPack wants to take the lead in developing ecologically responsible packaging.

Reuse of our environmentally friendly carrier bags is a major advantage. The bags are not used on a one-off basis. It is therefore not only a good idea to opt for jute carrier bags from the point of view of protecting the environment, but also from a commercial point of view.

DaklaPack offers the following responsible and sustainable packaging, including retail packaging: Jute carrier bags, jute wine bags, juco carrier bags, cotton carrier bags and non-woven carrier bags.
